Full-stack Software Engineer

Full-stack software engineer with 6+ years of experience building scalable products across startups and product teams. Strong expertise in TypeScript, React, Next.js, Node.js, SQL, and modern API integrations, with hands-on experience across frontend architecture, backend services, and platform integration work. **Experienced in banking/fintech, wealth management, e-commerce, SaaS, marketplace platforms and real estate and property-related fields.** I also bring practical domain knowledge in real estate valuation, property appraisal workflows, market comparison, and data-backed property analysis. Focused on clean architecture, maintainable systems, performance, and delivering practical business value in fast-moving environments.

Experience

Alpheya, Senior Full-stack Engineer / Frontend-heavy, contract

Oct. 2025 - present

- Worked inside a large Turborepo monorepo on wealth-management and advisor-facing products.
- Migrated critical frontend flows from GraphQL-based integrations to RPC services using ConnectRPC and Buf-generated clients.
- Built and refactored complex client, account, transfer, and reference-data flows in Next.js, TypeScript, React, and GraphQL.
- Improved maintainability through stronger typing, shared validation patterns, DTO mapping, and modular repository design.
- Integrated backend services with frontend apps while handling SSR/RSC constraints, caching, and production-grade data flows.
- Contributed to architecture decisions, code reviews, and delivery of high-impact financial-product features.

Proxied, Lead Full-stack Engineer, full-time

Sept. 2024 - Oct. 2025

- Built product websites, dashboards, and internal tools for a mobile proxy platform using Next.js, TypeScript, and Express.js.
- Designed secure, high-performance APIs and backend services.
- Led technical execution across buyer, hoster, and staff-facing platform features.
- Improved website performance and technical SEO, increasing speed and organic visibility.
- Mentored junior and mid-level developers, reviewed code, and helped define engineering standards.
- Set up development and staging environments and implemented CI/CD workflows using Coolify and Docker-based deployments.

Redberry, Full-stack Developer, full-time

Oct. 2022 - Sept. 2024

- Built scalable SaaS solutions using React, TypeScript, Laravel, and SQL.
- Designed secure, high-performance REST APIs and business-critical product flows.
- Refactored complex codebases to improve maintainability, type safety, and delivery speed.
- Mentored junior developers and conducted code reviews.

WallyPay, Front-end Developer, full-time

Jul. 2021 - Oct. 2022

- Rebuilt a business website from jQuery and PHP to Next.js, improving maintainability and reducing load times.
- Improved SEO and overall frontend quality according to best practices.

Auczon, Frontend Developer, full-time

Jun. 2020 - Jul. 2021

- Built frontend markup and user-facing flows for an e-commerce startup using JavaScript and PHP.
- Improved cross-browser compatibility and accessibility.
- Implemented SEO basics and integrated Google Analytics and advertising tools.

Technologies

Languages: TypeScript, JavaScript, PHP, SQL, HTML, CSS

Frameworks & Libraries: React, Next.js, Node.js, Express, NestJS, Laravel, GraphQL, ConnectRPC, TRPC, React Query, Redux, Zustand, Jotai, Zod, React Hook Form, Tailwind CSS, shadcn/ui, Storybook

Databases & ORMs: PostgreSQL, MySQL, SQLite, MongoDB, Drizzle ORM, Prisma, Sequelize, Mongoose

Tools & Platforms: Docker, Git, GitHub, CI/CD, Linux, Nginx, Figma, Jira, ClickUp, Coolify, Bun, Turborepo

Business Domains: Banking, fintech, wealth management, e-commerce, SaaS, marketplaces, real estate, property valuation, real-property market analysis

Projects

Advisor Desktop / Wealth Platform Integrations

Role: Senior Full-stack Engineer

Skills: Next.js, TypeScript, React, GraphQL, ConnectRPC, Buf, Zod, Turborepo

Company: Alpheya

Description: Advisor-facing financial platform work focused on frontend architecture, service integration, and migration of critical product flows from legacy GraphQL patterns to RPC-based services.

- Migrated reference-data and workflow integrations from GraphQL endpoints to ConnectRPC services.
- Refactored complex client, account, transfer, and reference-data frontend flows in a large monorepo environment.
- Built strongly typed integration layers using shared schemas, DTO mappers, and service abstractions.
- Improved frontend reliability and maintainability across SSR/RSC-heavy Next.js applications.

Marketplace for Mobile Proxies

Role: Lead Full-stack Developer

Skills: Next.js (App Router), GraphQL, Tailwind CSS, Zod, shadcn/ui, Docker

Company: Proxied

Description: Proxied connects buyers with sellers directly, allowing them to browse, select, and purchase mobile proxies. It has a landing, a Hoster dashboard for device hosts, and a Client dashboard for buyers.

- Led a team of 3 developers: set coding standards, delegated tasks, and ran thorough code reviews.
- Architected and shipped the Client and Hoster dashboards.
- Built a role-based Staff dashboard that unified operations, including user onboarding, payouts, and ticket triage.
- Implemented comprehensive technical SEO using SSR, structured data, and automated sitemaps.
- Created free tools on the Express backend, including private encrypted notes, a free proxy API, and an IP checker tool.

Connect

Role: Full Stack Developer

Skills: Next.js, TRPC, React Query, Drizzle ORM, Tailwind CSS, Matrix.js, Zod, shadcn/ui

Company: DHC

Description: A platform for doctors helping people with special disabilities manage their problems. The platform integrates the Matrix.js SDK library that enables secure communication between clients for live communication and secure file sharing.

- Set up Matrix.js to enable secure two-way communication between clients.
- Created TRPC endpoints using Zod and Drizzle ORM.
- Built a responsive and versatile chat UI.
- Conducted code reviews.

MoneyAlive

Role: Full Stack Developer

Skills: Laravel, PEST, React, PostgreSQL

Company: Redberry

Link: [MoneyAlive](#)

Description: MoneyAlive is a British company offering AI-generated financial services and video-based financial guidance to their clients.

- Created a REST API to bridge the existing project to the JavaScript SDK for the acquirer.
- Created and fully covered the existing API with unit and feature tests using PEST framework.
- Created a testing UI using React.
- Conducted code reviews.

Skippit

Role: Full Stack Developer

Skills: Laravel, MySQL, Next.js, Tailwind CSS, Chart.js

Company: Skippit

Link: [Skippit](#)

Description: Skippit is a vertical ERP solution for professional services companies, enhancing planning, forecasting, and decision-making capabilities.

- Transitioned the project to SaaS, contributing heavily across both frontend and backend development.
- Refactored large components for performance and maintainability.
- Refactored a large codebase and developed reusable complex React components using composition pattern.
- Conducted code reviews.

iMall / Multi-tenant Marketplace

Role: Full-stack Engineer

Skills: Next.js, TypeScript, Tailwind CSS, SQL, Auth, Multi-tenant architecture

Company: Personal Project

Link: [GitHub](#)

Description: A multi-tenant marketplace platform concept focused on scalable catalog, vendor onboarding, and tenant-isolated storefronts.

- Designed the project structure for multi-tenant separation using tenant-aware routing and data boundaries.
- Built core marketplace primitives, including catalog, listings, filters/search, vendor/admin flows.
- Focused on performance, SEO-friendly pages, and maintainable modular architecture.

Real Property Market Analysis & Valuation Work

Role: Market Analyst / Property Valuation Specialist

Skills: Real estate market analysis, property appraisal, comparable sales, market research, Excel, reporting

Company: Independent / Project-based

Description: Practical experience in real-property market research, valuation support, and data-backed market comparison work, mainly focused on Georgian real estate markets.

- Analyzed real estate market data using comparable listings, historical price movement, location factors, property condition, and market trends.
- Prepared structured market analysis sections for valuation-style reports.
- Worked with property appraisal logic, including direct comparison, price adjustment, market evidence review, and report-ready justification.
- Built strong business-domain understanding around real estate, pricing, market liquidity, and value drivers.

Hobbies

Walking in the mornings and evenings, watching sci-fi films and anime, playing chess and other board games, camping, and going on trips, especially with my big family and sometimes with my friends.
